EMship+ key points
> An interdisciplinary combination of technical, scientific and management skills obtained through a worldwide unique qualification program supported by nine leading universities, offering a double degree Master diploma and excellent career opportunities to graduates.

> Four different specializations offered during the second year, after a one-year common core.

> The opportunity to experience a variety of academic and cultural environments through a mobility scheme covering two or three different countries.

> An international network of associated universities and industrial partners.

Tuition fees (with health insurance)
> 8,500 € per year for Non-EU students
> 4,500 € per year for EU-students.

Scholarships
Scholarships from European Union (EACEA) are available covering living expenses (1000 €/month), travel expenses, health insurance and full tuition fees.

Language
> All the lectures are in English.
> French, German, Polish and Spanish language courses are available in corresponding 2nd year universities.

Job prospects
> ship and marine structures design
> numerical simulation for fluids and structures
> marine renewable energies
> building and maintenance in shipyards
> safety and sustainability management
> ...

Application
Online on http://www.emship.eu
**Consortium**

The consortium is composed of nine European universities with a strong expertise in the diverse fields of Marine Engineering:

- University of Liège (Belgium) coordinator of the program [http://www.anast.ulg.ac.be](http://www.anast.ulg.ac.be)
- University of Rostock (Germany) [http://www.schiffbaufoerschung.de](http://www.schiffbaufoerschung.de)
- West Pomeranian University of Technology (Poland) [http://www.wtm.zut.edu.pl](http://www.wtm.zut.edu.pl)
- Polytechnic University of Madrid (UPM) [http://www.upm.es/internacional](http://www.upm.es/internacional)
- Centrale Nantes (France) [http://www.ec-nantes.fr](http://www.ec-nantes.fr)
- Dunarea de Jos University of Galati (Romania) [http://www.ugal.ro](http://www.ugal.ro)
- ICAM – Institut Catholique d’Arts et Métiers (France)
- University of Genova (Italy) [http://www.unige.it](http://www.unige.it)
- Southampton Solent University (UK) [http://www.solent.ac.uk/](http://www.solent.ac.uk/)

The consortium includes seven associated partners from prestigious universities worldwide:

- University of Michigan (USA)
- University of Osaka (Japan)
- Istanbul Technical University (Turkey)
- Federal University of Rio de Janeiro (Brasil)
- Pusan National University (South Korea)
- University of New South Wales (Australia)
- University of Sciences and Technology of Oran (Algeria)

A Strategic Advisory Board consisting of high level decision markers of leading European maritime companies and representatives from the associated universities actively contribute to the total quality management.

The EMship+ program is supported by the WEGEMT organisation ([www.wegemt.org](http://www.wegemt.org)).

**Admission criteria**

Some pre-requisites in mathematics, physics, solid mechanics, materials science, fluid mechanics, dynamics of mechanical systems and computer programming are required.

English B2 level (TOEFL) or equivalent is required too.

Candidates with specific CVs are also invited to apply:

Engineers searching for advanced education in:

- Hydrodynamic and structural analyses of ships and offshore structures,
- CAD and Information technology,
- Shipyard and production technology,
- Commercial ships, mega/motor yachts, sailing pleasure crafts, ...
- Offshore Wind Energy (Supply vessels, Offshore wind turbines, FOWT, ...),
- Ocean Engineering (Oil and Gas technology)

**EMship+ directly relates to the future needs of the European and international marine industry.**

**Study Program**

The mobility scheme involves 2 years in 2 (or 3) countries:

The first year (60 credits) is dedicated to general lectures in mechanical engineering (1st semester) and in Advanced Ship Design (2nd semester) in University of Liège.

**MASTER THESIS and INTERNSHIP: 30 ECTS credits**

They are prepared under the supervision of the university where students are enrolled for the 2nd year.

They can be undertaken in companies, shipyards or in universities from the EMship+ consortium and world-recognized universities.

EMSHIP graduates will be awarded a double degree from University of Liège and the relevant 2nd year university.
